Subject: Etna Mine - Notification of shaft and sink hole security work (S/021/009)

I received a phonecall from Jerry Glasier (American Cometco Inc.) yesterday afternoon advising us that the shaft and sinkholes (2) have been secured with fencing and signs. He said they are ready for our inspection. I thanked him for the call and said we would confirm adequacy of the security measures during our next visit to the area.

PLEASE PLACE A COPY OF THIS EMAIL NOTIFICATION IN THE MINE FILE AND DATABASE RECORDS.
